INTERNATIONAL SEARCH REPORT

International application No. PCT/US99/24137

Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

The present invention provides a continuously-tunable external cavity laser (ECL) with a compact form factor and precisae tuning. A novel interference filter which may be used to tune the ECL provides an absence of mode-hopping and reduce feedback from both spurious interference(210) and reflections(214) in the external cavity. A novel tuning mechanism is disclosed which provides for mechanical FM tuning of a wide range ECL tuning elements such as an interference filter, a diffraction elementand a retroreflector(122). A novel feedback circuit is disclosed which provides clsed loop feedback for selecting output wavelength in a las
